### Essential Duties and Responsibilities

*The essential functions include, but are not limited to the following:*

- Lead software verification activities for a complex medical imaging system
- Lead anomaly reviews and track disposition
- Write test plans, write, and execute test protocols and report bugs found during testing
- Participate in hardware integration testing activities
- Work closely with engineering to help them understand the issues found
- Write automated tests and software utilities to help with software verification activities

Pay range in California, United States

Exact compensation may vary based on skills, experience, and location. Base salary: \$120,000 - \$180,000

### Note:

This job description in no way states or implies that these are the only duties to be performed by the employee(s) incumbent in this position. Employees will be required to follow any other job-related instructions and to perform any other job-related duties requested by any person authorized to give instructions or assignments. All duties and responsibilities are essential functions and requirements and are subject to possible modification to reasonably accommodate individuals with disabilities. To perform this job successfully, the incumbents will possess the skills, aptitudes, and abilities to perform each duty proficiently. Some requirements may exclude individuals who pose a direct threat or significant risk to the health or safety of themselves or others. The requirements listed in this document are the minimum levels of knowledge, skills, or abilities.
